

MIND YOUR 4s. Use four 4s and any operations you can think of to get to each target number. As for mathematical operations, **anything goes!** The basic +, -, *, / along with exponents, roots, decimals (4.4 or .4), concatenation (44), percentages, repeating decimals ($\overline{4}$), and many more are legal. A few have been filled in to get you started. Remember to include exactly 4 4s (that's four fours) in each equation, and use proper notation.
